Emergency Response Telephone

In an emergency just a single push on either of the 2 remotes supplied (watch or pendant) will set off the automatic dialing in sequence of up to 6 preprogrammed numbers – until a reply is reached! An emergency message that has been prerecorded for/by you will play. The telephone will enter speakerphone mode so there is no need for the caller to try and reach for the handset. MORE than a telephone, MORE than a Panic button- an emergency response system with many features.
